### SECTION 5: Fire-fighting measures

#### 5.1 Suitable extinguishing media

Water spray, Foam, Carbon Dioxide, Dry-Chemical.

#### 5.2 Specific hazards arising from the chemical

Avoid high temperatures that may cause thermal decomposition or explosion, especially in confined or poorly ventilated spaces.

-----

Zinc oxide: Zinc/zinc oxides

#### 5.3 Special protective actions for fire-fighters

Wear positive pressure, self contained breathing apparatus (SCBA) and goggles. Avoid exposure to smoke of fumes. Contain any liquid runoff.

---

### SECTION 6: Accidental release measures

#### 6.1 Personal precautions, protective equipment and emergency procedures

For small or incidental spills, the minimum personal protective equipment should be rubber gloves, rubber apron, and chemical goggles. Uncontrolled releases should be responded to by trained personnel using pre-planned procedures. Proper protective equipment should be used. Gas masks with ammonia canister or SCBA gear may be required. For large spills, contain by diking with soil or other non-combustible absorbent material. Dilution with water will reduce the release of ammonia vapors. Keep material out of sewers, storm drains, and surface waters. Comply with all applicable government regulations on spill reporting, handling, and waste disposal.

### 8.3 Individual protection measures, such as personal protective equipment (PPE)

#### Pictograms

#### Eye/face protection

Chemical dust/splash goggles or full-face shield to prevent eye contact. As a general rule, contact lenses should not be worn when working with chemicals because they contribute to the severity of an eye injury. An eyewash should be nearby and ready for use.

#### Skin protection

Rubber gloves with gauntlets. Use body protection appropriate for task. Chemical-resistant coveralls and rubber aprons are generally acceptable. A safety shower should be nearby and ready for use.

#### Body protection

Use body protection appropriate for task. Chemical-resistant coveralls and rubber aprons are generally acceptable. A safety shower should be nearby and ready for use.

#### Respiratory protection

If work conditions generate vapors or mist, wear a NIOSH approved respirator appropriate for these emission levels. Appropriate respirator may be a full facepiece respirator, an SCBA in the pressure demand mode, or a supplied-air respirator.
